

Mathematics 414, Problem Set #9
(due by 1:00, November 10)

Problem 1. Make up and solve a workshop problem that has (necessarily fairly low level) scientific content.

Problem 2. Make up and solve a 6/7 workshop “word” problem, imitating, but not too closely, an (in your opinion) successful 2009–2010 problem.

Problem 3. Make up and solve a workshop problem, any level. This time, in contrast with most of the “make up a problem” instructions, try to come up with something new.
