Math 340   Final exam instructions   R. Anstee and H. Lavenant 2020

Date

April 15 2020, starting at 8:30am PDT.

Length

3 hours + 1 additional hour to upload your work, that you can use as you wish. You have to submit your work before 12:30am PDT. If you are registered to the Centre for Accessibility and have extra time, we have already contacted you to tell you what is your submission deadline.

Getting the exam

The exam will be released at 04/15 8:30am PDT. It will be attached with the Crowmark email. You can also find it at

- At `https://www.math.ubc.ca/~anstee/math340/20340final.pdf`

- At `https://hugolav.github.io/teaching/20340final.pdf`

Completing your work

The exam is open book. You can use any paper resource, any electronic pdf resource that was posted by the instructors. Think of this as an open book exam. Of course you study in the usual way but don't have to memorize things.

You can write on paper and scan your work, or directly send us a pdf file (like the output from latex).

Integrity pledge

It is available at

- At `https://www.math.ubc.ca/~anstee/math340/integritypledge.pdf`

- At `https://hugolav.github.io/teaching/integritypledge.pdf`

You have to sign it (electronically) or print and scan is fine, and to attach it to the first question of your exam.

Submitting your work

Your work is to be submit on Crowdmark. You will receive the invitation at the beginning of the exam. You can also access Crowdmark at

<div align="center">

`https://app.crowdmark.com/sign-in/ubc`

</div>

You must submit your work before 12:30am PDT (except if you have extra time). You may wish to submit drafts of your answers well before that and then update your answers if you have more to submit.

Technical issues

In case of problems, let us know **during the exam time** at `anstee@math.ubc.ca`. In very delicate situations, you can call Richard Anstee at 01 778 323 6105.

If you encounter a technical issue, we will still ask you to upload your work on Crowdmark (even after the deadline) because we will grade only through Crowdmark. If you have proof (for instance sent by email during the exam time) that you completed your work before the deadline but that your submission on Crowdmark is after the end of the exam, you will not be penalized.
