MAT 305–201 APPLIED COMPLEX ANALYSIS: OUTLINE
2016/2017 Term 2

Instructor: Juncheng Wei, LSK 303B, Tel. 604-822-6510, E-mail: jcwei@math.ubc.ca

Time and Place: Mon-Wed-Fri: 12:00 PM to 1:00 PM in BUCH-A201

Notes: Notes are important. Old notes are available at www.math.ubc.ca/ward and www.math.ubc.ca/jcwei

Topics and Teaching Scheme

- Fundamentals; complex exponentials, roots of unity, powers and roots, elementary mappings: (Sections 1.1-1.7)
- Functions of a Complex Variable: analytic functions, Cauchy-Riemann equations, Harmonic functions, some special functions such trigonometric functions (Sections 2.1-2.6,3.1-3.2)
- Multivalued functions, inverse functions, and branch cuts. The Logarithm function. (Sections 3.3, 3.5, and course notes).
- Contour integration. Cauchy's integral theorem, path independence, (Sections 4.14.7)
- Laurent series, singularities, poles and residue Calculus (Sections 5.5.7,6.1-6.5)
- Fourier transform integrals (Section 8.18.2 and class notes)
- Laplace transform integrals, integrals of multivalued functions, Nyquist criteria and applications. Fourier transform integrals (section 8.3 and class notes)

Grading: The weighting will be: Final 50/100, 2 Midterms 20/100 each, HW 10/100. The first midterm is Feb. 13rd, and the second midterm is March 24th. There are no make-up midterms. If you miss a midterm for a valid medical reason, the weighting for the final will be adjusted. Other than this, no re-negotiating of the weights of the different components of the overall grade will be considered.

Assignments: There will be 7 to 10 assignments. (I will post them on my web page: www.math.ubc.ca/~jcwei.) No late homeworks will be accepted for any reason. I will drop the lowest HW score.

Office Hours: Monday, Wednesday, Friday, 4:30-5:30pm

Final Remark: Lecture notes, assignments, solutions to assignments and examinations will be posted on my web when they are ready.

Any questions? Please send me an email or drop by my office LSK 303B.
