

UBC/UMC

undergraduate mathematics colloquium

clay ▪ bluman ▪ anstee ▪ martin ▪ kohler ▪ cytrynbaum

the next speaker is

David Kohler *The Missing Region Problem*

In this talk, we will study the missing region problem and its solution. This will allow us to discuss various interesting mathematical ideas and concepts along the way, such as the strong law of small numbers and the Euler characteristic of a polyhedron ... some neat thinking outside the box, and we'll be back to Pascal's triangle in the end.

UBC/UMC is on **wednesday**, november 18
3:00 to 4:00 in **GEOG 214** (GEOG is located just west of MATH)

drinks and snacks will be provided

for more information check out www.math.ubc.ca/~fsl, and follow the link at the bottom
