Midterm — June 4th 2018  Duration: 50 Minutes
This test has 5 questions on 9 pages, for a total of 40 points.

• Read all the questions carefully before starting to work.
• Q1-Q3 are short-answer questions; put your answer in the boxes provided.
• Q4 and Q5 are long-answer; you should give complete arguments and explanations for all your calculations; answers without justifications will not be marked.
• Continue on the back of the previous page if you run out of space.
• Attempt to answer all questions for partial credit.
• This is a closed-book examination. None of the following are allowed: documents, cheat sheets or electronic devices of any kind (including calculators, cell phones, etc.)

Student Conduct during Examinations

1. Each examination candidate must be prepared to produce, upon the request of the invigilator or examiner, his or her UBCcard for identification.

2. Examination candidates are not permitted to ask questions of the examiners or invigilators, except in cases of supposed errors or ambiguities in examination questions, illegible or missing material, or the like.

3. No examination candidate shall be permitted to enter the examination room after the expiration of one-half hour from the scheduled starting time, or to leave during the first half hour of the examination. Should the examination run forty-five (45) minutes or less, no examination candidate shall be permitted to enter the examination room once the examination has begun.

4. Examination candidates must conduct themselves honestly and in accordance with established rules for a given examination, which will be articulated by the examiner or invigilator prior to the examination commencing. Should dishonest behaviour be observed by the examiner(s) or invigilator(s), pleas of accident or forgetfulness shall not be received.

5. Examination candidates suspected of any of the following, or any other similar practices, may be immediately dismissed from the examination by the examiner/invigilator, and may be subject to disciplinary action:
   (i) speaking or communicating with other examination candidates, unless otherwise authorized;
   (ii) purposely exposing written papers to the view of other examination candidates or imaging devices;
   (iii) purposely viewing the written papers of other examination candidates;
   (iv) using or having visible at the place of writing any books, papers or other memory aid devices other than those authorized by the examiner(s); and,
   (v) using or operating electronic devices including but not limited to telephones, calculators, computers, or similar devices other than those authorized by the examiner(s) electronic devices other than those authorized by the examiner(s) must be completely powered down if present at the place of writing).

6. Examination candidates must not destroy or damage any examination material, must hand in all examination papers, and must not take any examination material from the examination room without permission of the examiner or invigilator.

7. Notwithstanding the above, for any mode of examination that does not fall into the traditional, paper-based method, examination candidates shall adhere to any special rules for conduct as established and articulated by the examiner.

8. Examination candidates must follow any additional examination rules or directions communicated by the examiner(s) or invigilator(s).
Mathematics 104-921

Short-Answer Questions. Put your answer in the box provided. Full marks will be given for a correct answer placed in the box, while part marks may be given for work shown. Unless otherwise stated, calculator ready answers are acceptable.

1. (a) You invest money in a fund compounded daily for two years with a nominal rate of 5%. You then switch to a fund compounded continuously with a real interest rate of 5% for another three years. At the end of this period the fund increased by $10,000, how much money did you invest initially?

   Answer:

   

   (b) An umbrella factory sells 6,000 umbrellas a year at the cost of $8 a piece. An umbrella sale last December showed that a decrease of $1 in the price of an umbrella caused an increase in selling of 500 umbrellas a month.

   i. Find the linear demand equation for the umbrellas.

   Answer:

   

   ii. Compute the maximal revenue of the factory.

   Answer:
2. (a) Find a value $a$ so that the function

$$f(x) = \begin{cases} \sqrt{x^2 + a}, & x \leq a \\ x + a, & x > a \end{cases}$$

is continuous for all $x$. 

\[\text{Answer:}\]

(b) Show that the equation $\ln(x) = x^3 - 2$ has a solution. Justify your answer.
3 marks  3. (a) Evaluate

\[ \lim_{x \to 1} \frac{4x^2 - 3x - 1}{x^2 - 3x + 2} \]

Answer:

3 marks  (b) Compute the tangent line of \( y = \frac{4x}{x^2 + 1} \) at \( x = 0 \).

Answer:

3 marks  (c) Compute \( y' \) given \( y = e^{\log(x)^2 + \sin(x^2)} \)

Answer:
Full-solution problems: Justify your answers and show all your work. Place a box around your final answer. Unless otherwise indicated, simplification of answers are required in these questions.

6 marks 4. Consider the curve given by $y^2 - xy + x^3 = 1$. Find $\frac{d^2f}{dx^2}(1) = f^{(2)}(1)$ assuming that $y = f(x)$ near $(1,0)$.

Answer:
5. Let \( f(x) = \frac{1}{\sqrt{x+1}} \). Use the definition of the derivative to find \( f'(1) \). No marks will be given for the use of any differentiation rules. A bonus point will be granted to students who will calculate \( f'(a) \) for arbitrary \( a > -1 \).
