## Student Conduct during Examinations

- Each examination candidate must be prepared to produce, upon the request of the invigilator or examiner, his or her UBCcard for identification.
- Candidates are not permitted to ask questions of the examiners or invigilators, except in cases of supposed errors or ambiguities in examination questions, illegible or missing material, or the like.
- No candidate shall be permitted to enter the examination room after the expiration of one-half hour from the scheduled starting time, or to leave during the first half hour of the examination. Should the examination run forty-five (45) minutes or less, no candidate shall be permitted to enter the examination room once the examination has begun.
- Candidates must conduct themselves honestly and in accordance with established rules for a given examination, which will be articulated by the examiner or invigilator prior to the examination commencing. Should dishonest behaviour be observed by the examiner(s) or invigilator(s), pleas of accident or forgetfulness shall not be received.
- Candidates suspected of any of the following, or any other similar practices, may be immediately dismissed from the examination by the examiner/invigilator, and may be subject to disciplinary action:
(a) speaking or communicating with other candidates, unless otherwise authorized;
(b) purposely exposing written papers to the view of other candidates or imaging devices;
(c) purposely viewing the written papers of other candidates;
(d) using or having visible at the place of writing any books, papers or other memory aid devices other than those authorized by the examiner(s); and,
(e) using or operating electronic devices including but not limited to telephones, calculators, computers, or similar devices other than those authorized by the examiner(s)-(electronic devices other than those authorized by the examiner(s) must be completely powered down if present at the place of writing).
- Candidates must not destroy or damage any examination material, must hand in all examination papers, and must not take any examination material from the examination room without permission of the examiner or invigilator.
- Notwithstanding the above, for any mode of examination that does not fall into the traditional, paper-based method, examination candidates shall adhere to any special rules for conduct as established and articulated by the examiner.
- Candidates must follow any additional examination rules or directions communicated by the examiner(s) or invigilator(s).

## Please read the following points carefully before starting to write.

- In all questions except Question 1, give complete arguments and explanations for all your calculations; answers without justifications will not be marked.
- Write clearly and legibly, in complete sentences. Make sure that the logic of your argument is clear. Remember that you will be graded both on your command of the material and on the quality of your writing.
- This is a closed-book examination. None of the following are allowed: documents, cheat sheets or electronic devices of any kind (including calculators, cell phones, etc.).
- You may not leave during the first 30 minutes or final 15 minutes of the exam.
- Read all the questions carefully before starting to work.
- Continue on the back of the previous page if you run out of space.

16 marks 1. Short questions: in this problem, correct answers without explanation are sufficient.
(a) (4 marks) State the negation of the following statement:

$$
\forall a \in A \exists b \in B \text { s.t. } \forall c \in A,|a-b| \leq 2 \Rightarrow b+c>3
$$

(b) (4 marks) Give an example of a non-empty set $A \subset \mathbb{R}$ with $A \neq \mathbb{R}$ such that $A$ does not have a least element.
(c) (4 marks) Give an example of a function $f: \mathbb{Z} \rightarrow \mathbb{Z}$ such that $f$ is surjective but not injective.
(d) (4 marks) Give an example of a function $f: \mathbb{R} \rightarrow \mathbb{R}$ and a set $A \subset \mathbb{R}$ with $A \neq \mathbb{R}$ such that $f^{-1}(f(A)) \neq A$.

12 marks 2. (a) (6 marks) Prove that every real number $x$ satisfies $x^{2}+4>|2 x-1|$.
(b) (6 marks) Prove the following statement: $\exists x \in \mathbb{R}$ such that $\forall y \in \mathbb{R}, y \leq x-1 \Rightarrow$ $y^{2}-x^{2} \geq 4$.

12 marks 3. Prove or disprove the following statements:
(a) (6 marks)

$$
\forall x \in \mathbb{R}, \forall y \in \mathbb{R},(\forall z \in(0, \infty) x-y \leq z) \Rightarrow x=y
$$

(b) ( 6 marks) Let $A, B, C$ be sets, then

$$
A-(B-C) \subseteq(A-B) \cup(A \cap C)
$$

10 marks 4. Prove that the number $\sqrt{2}+2 \sqrt{3}$ is irrational. (In this question, you may use that $\sqrt{2}$ and $\sqrt{3}$ are irrational.)

This page has been left blank for your workings and solutions.

8 marks 5. Prove that if $|A|=|B|$, then $|P(A)|=|P(B)|$.

12 marks 6. (a) ( 6 marks) Let $a, b \in \mathbb{Z}$. Prove that if $a \equiv 1 \bmod 2$ and $b \equiv 3 \bmod 4$, then $a^{2}+b \equiv 0$ $\bmod 4$.
(b) ( 6 marks) Prove that $3 \nmid n$ if and only if $n^{2} \equiv 1 \bmod 3$.
7. Prove by induction.
(a) (8 marks) For any non-negative integer $n$

$$
\sum_{r=1}^{n} r(r+1)=\frac{1}{3} n(n+1)(n+2)
$$

(b) (8 marks) For any non-negative integer $n$

$$
\sum_{j=1}^{n} j^{2}>\frac{n^{3}}{10}
$$

14 marks 8. (a) (10 marks) Prove that $f:(-1,1] \backslash\{0\} \rightarrow \mathbb{R}$ defined by $f(x)=\frac{1}{x}-x$ is a bijection.
(b) (4 marks) Prove that $|(-1,1] \backslash\{0\}|=|\mathbb{R}|$.
