Information for Math 227 Final Exam

- Office Hours for week of April 9: MTuWTh 4-5:30
- Class party and bonus lecture: Monday, April 9, 12PM, Math 102
- Review session: Thursday, April 12, 6:30PM, Math 102
- Final Exam: Monday, April 16, 12PM
- Syllabus: Sections 11.1, 11.3 and 11.4, Chapters 15, 16, and Sections 17.1, 17.2.
- There will be no problems on physics.
- Closed book, no notes, no books, no calculators
- You may use results established in class or homework.
- I have posted a review sheet on Green, Gauss and Stokes theorem and suggestions on approaches to calculating line integrals and surface integrals using the theorems.
- I have posted a practice final exam and will post solutions later. You can find some past finals on the department webpage: click on undergrad tab, then click on final exams in left panel and then click on past exams.
- The Math Club sells final exam packages with solutions for Math 317 (regular vector calculus) but not Math 227. Note that some solutions may not be correct.
