

**UBC Seminar of algebraic groups, Galois  
cohomology and related topics  
Wednesday, February 25, 10-10:50am, Room TBA.**

**Speaker:** Masoud Kamgarpour (UBC)

**Title:** Group cohomology and extensions

**Abstract:** It is well-known that the second group cohomology is related to central extensions. After reviewing this fact, I will discuss the interpretation of the third cohomology group in terms of "hyper-extensions".
