

**UBC Seminar of algebraic groups, Galois
cohomology and related topics
Friday, February 13, 10-10:50am, WMAX 110.**

Speaker: Angelo Vistoli (Scuola Normale Superiore, Pisa)

Title: Group actions and moduli problems: some examples

Abstract: The talk would aim at explaining the idea of a quotient stack in very concrete terms, giving some elementary, but non-trivial, examples.
