# Introduction to Frames

- All your favourite  $\text{\LaTeX}$  commands still work.
- They are now placed in frames.

## Text in a block

If you want to emphasize some text you can put it in a block.

## Theorem (Your initials, Year)

*You can also use *theorem*, *lemma*, *proof*, *corollary*.*

You can compare two things that interest you.

## Column 1

You can compare two things that *really* interest you.

This can be done using columns.

## Column 2

This can be done using columns *and* blocks.

- To reveal items ...

- To reveal items ...
- one line at a time ...

- To reveal items ...
- one line at a time ...
- you can use pause.

- To reveal items ...
- one line at a time ...
- you can use pause.
- You can also highlight text using `alert`.

# Alert and Visible

The commands `alert` and `visible` can be used to highlight text or make it appear. However, these commands don't work well with `pause`.
