\section{Frames}

\begin{frame}{Introduction to Frames}

\begin{itemize}
  \item All your favourite \LaTeX{} commands still work.
  \item They are now placed in \texttt{frames}.
\end{itemize}

\begin{block}{Text in a block}
If you want to emphasize some text you can put it in a \texttt{block}.
\end{block}

\begin{theorem}[Your initials, Year]
You can also use \texttt{theorem}, \texttt{lemma}, \texttt{proof}, \texttt{corollary}.
\end{theorem}

\end{frame}

%%%%

\begin{frame}{Columns}

\begin{columns}
\column{.3\textwidth}
You can compare two things that interest you.
\column{.3\textwidth}
This can be done using \texttt{columns}.
\end{columns}

\

\begin{columns}
\column{.3\textwidth}
\begin{block}{Column 1}
You can compare two things that \emph{really} interest you.
\end{block}
\column{.3\textwidth}
\begin{block}{Column 2}
This can be done using \texttt{columns} \emph{and} \texttt{blocks}.
\end{block}
\end{columns}

\end{frame}

%%%%

\section{More Exciting Frames}

\begin{frame}{Pause}

```

```
\begin{itemize}
\item To reveal items ... \pause
\item one line at a time ... \pause
\item you can use \texttt{pause}. \pause
\item You can also highlight text using {\texttt{alert}}.
\end{itemize}
\end{frame}
```

%%%

```
\begin{frame}{Alert and Visible}
```

The commands `\texttt{alert}` and `\texttt{visible}` can be used to highlight text or make it appear. However, these commands don't work well with `\texttt{pause}`.

```
\begin{center}
```

```
\alert<2>{Highlight this now}
```

```
\alert<3>{Highlight this later}
```

```
\visible<1,2,3,5,6,7>{Visible now.}
```

```
\invisible<6,7>{Sometimes not.}
```

```
\visible<1,2,3,4,6,7>{And now.}
```

```
\end{center}
```

```
\end{frame}
```

%%%

```
\begin{frame}{Flashy Flourishes}
```

```
\begin{center}Can be obtained with a simple command.\end{center}
```

```
\transblindshorizontal %Horizontal blinds pulled away
```

```
%\transblindsvertical %Vertical blinds pulled away
```

```
%\transboxin %Move to center from all sides
```

```
%\transboxout %Move to all sides from center
```

```
%\transdissolve %Slowly dissolve what was shown before
```

```
\end{frame}
```

```
\end{document}
```
