

MATH 444: MATHEMATICAL RESEARCH AND WRITING

Assignment 9 Due Thursday March 17, 2021.

Richard Anstee

This is a group assignment. Give a progress report on the project so far. You can combine material submitted in Assignment 8 and other material you propose to cover in your final project. This will give us a chance to consider whether the project is over ambitious or how it can be extended. I will zoom each group to discuss the report.

Our schedule will give you over two weeks to prepare the project before the final due date of March 31. No lectures March 29. We can meet in class both March 29 and March 31. There will be at least one more mandatory group meeting of your group with me to discuss. It can be in person or by zoom. I will email you.
